MEMORANDUM FOR THE RECORD		DATE 29 July 75
SUBJECT Opinion Request (reexamination) PCT Microbiology of S&T Bilateral		FILE NUMBER
<p>Bill Veale, SES, phoned concerning the Army objection to a Microbiology PCT to Army's Nattick Labs, Nattick, Mass. This was processed as a telephone opinion in early July at the request of Ray Pardon. Chris McGurk passed to me an objection which in turn I passed to Ray.</p> <p>Now, Bill Root has approached Veale with two different questions on this matter. First, Root would like Army repelled to see if it is a strong objection. Evidently the US side is attempting to put pressure on the Soviets to show us a single cell facility (ies) and Nattick Labs might be a good trade off.</p> <p><i>Dr. Nistrum</i></p> <p>In addition, Root noted that the head, Engineering and Technology Group of Nattick was scheduled to give a paper at the symposium, beginning this visit to be held at the U of Penn. Root (because of the Nattick objection) <del>held</del> held that individual's abstract out of the package being forwarded to the Soviets prior to the symposium. Root requests that we double check with Army that presentation of this paper is OK. Paper is on 'Equipment and Instrumentation Requirements of Cellulose-Cellulase Processing'.</p> <p><i>(Nattick visit proposal made by Dr. Humphrey.)</i></p> <p><i>Chris: - says Nattick says NO - strongly - <sup>has</sup> hosted before &amp; they know &amp; paper apparently cleared at Nattick - <sup>side</sup> doesn't want any more.</i></p>
